About us

Greg Barnes and Chris Smith: Bespoke wader manufacturers.

Greg has been tailoring Neoprene wetsuits and waders since 1984 and has designed a vast range of neoprene and technical outdoor products for large commercial organisations, lords, ladies, celebrities and everyday people alike.

Chris has a background in fine leather work and turned her skills to the water sports industry in 1980. Initially involved in high volume manufacture she joined Greg in 1993 and has been involved in projects for ITV, the BBC and independent TV including Coronation Street, Tomorrows World and The Biggest Loser.

Our waders are custom built - no two are the same - even two waders made for you will have subtle differences. They will fit you, be comfortable and last

The process of building our custom waders is long and laborious. We take great care to get it right for you.

We would like **you** to take great care to get it right for you too.

Our waders will fit your measurements. Please endeavour to make them accurate and do not be tempted to 'add a bit just in case'

Warranty

We always endeavour to get it right. However if we get it wrong or it goes wrong then we will put it right. Wear and tear on the other hand is down to you - but even that we can put right in our repair shop/department.

YOUR CHOICE OF MATERIAL

Neoprene Is the material used for the many forms of wetsuits and dry suits. It is water-proof, warm and flexible. Good for cold water and those who feel the cold even in the summer.

Trytex Trilaminate Two layers of heavy weave Poly/Nylon are compressed onto a layer of butyl to form a thin flexible, waterproof fabric. It has a similar feel to a heavy breathable fabric (without the breathability) It is good for summer fishing and will pack up small.

Your Options

Boots

We use Dunlop Wellington boots as our preferred fitment. But we can fit the boot of your choice.

Sock End - A neoprene sock with a one piece sole and heel unit (no uncomfortable centre seam to stand on) wear with your favourite boots for ultimate variety. (All sizes)

Cleat Boot - A heavy duty boot with a cleat sole. Providing good grip on a range of surfaces. Sizes 5-15.

Other options

Basic Hand warmer Pocket

Flat neoprene pocket with hand holes high to chest front.

3D Three Function Neoprene Hand warmer Pocket

3 dimensional pocket with zipped opening to top, open divider slots to front and hand warmer section behind.

Neoprene Gravel Guards – Fitted

Fitted to waders with lace toggle to the front.

Neoprene Gravel Guards - Loose,

Velcro or zip fastening to side with lace toggle to the front.

Knee Pads

Flexible, thin and durable (not thick rubber ones)

Bum Pad

Flexible, thin and durable (not thick rubber ones)

Gybe Trytex Waders

- High chest wader
- Super tough elasticated braces,

- Quick release adjusters
- Accessory D rings to front

Gybe Trytex Trilaminare Waders

Custom built to your measurements from super tough British Trytex Trilaminare material. This material is truly a 3 ply 'sandwich' of fabrics and butyl rubber. It remains flexible but is much more durable than breathable fabrics but retains a soft fabric feel. These waders are lightweight, comfortable and pack up small. They are cut, sewn and double glued then taped internally completely by hand. Popular with the professional. **Boots – see options list.**

Trytex Chest Wader - comfortable and practical.

- High chest wader
- Super tough neoprene padded braces
- Quick release adjusters
- Accessory D rings to front.
- An internal fly box pocket
- Optional-
3D three function neoprene hand warmer pocket

Trytex Trouser Wader

A flexible, lightweight wading trouser.

- Cut high on the waist
- Super tough neoprene padded braces
- Quick release adjusters
- Belt loops can be specified

Trytex Thigh Wader

- Cut to fit you.
- Durable webbing side straps with quick release adjusters.
- Super tough

Neoprene Wader

High Chest
Wader

Quick release
Brace adjusters.

Internal fly box
pocket

Neoprene
Shoulder straps

D rings for accessories

Neoprene Wader

Built to fit your measurements from 4mm neoprene, our waders are cut, double glued and finished completely by hand here in the UK. The outer seams are finished with the same dry seaming used in commercial grade diving suits and indeed the whole construction of our garments is to that standard. **Boots – see options list.**
